ABSTRACT

The Proceedings of the Conference will be published by IAASS as Special Publication SP-014 on CD-ROM or USB Flash Drive.

Authors must deliver their full papers by 19 September 2014 as PDF files. The link for papers upload will be provided as of 1 July 2014 at: <http://iaassconference2014.space-safety.org/author-instructions/>

Please read the following instructions for the preparation of your paper in accordance with IAASS’s standard for conference proceedings. **Each submission should resemble these instruction sheets in format and style.** Start with a concise abstract (limited to 15 lines or 150 words) that summarises the contents of the paper.

1. GENERAL SPECIFICATIONS

The paper must be prepared in this two-column format and **must not be longer than 10 pages**, unless differently agreed by the IAASS’s Conference Proceedings Editor (carmen.felix@gmail.com).

Use American English spelling and the Chicago Manual of Style as the main reference for style and grammatical questions. Please note the usage of direct, active writing instead of passive style. For example, do not write, “Jupiter’s moons were discovered by Galileo.” Instead, write “Galileo discovered Jupiter’s moons.” All writing must be original, and quotations should be paraphrased whenever possible. It is preferable to use few or no quotations.

2. PAGE LAYOUT

- Paper format: standard A4 (297x210 mm),
- two-column format (8 cm each)
- margins: top 25 mm, left and right 20 mm, bottom 37 mm.

3. HEADERS AND FOOTERS

Both the header and the footer should be left empty. Do not add page numbers.

4. TITLE AND AUTHOR AFFILIATION

The paper title, author(s) name(s), affiliation, complete mailing address and email should be centred at the top of the first page. If there are several authors, the complete affiliation should be given for each of them using superscripts⁽¹⁾ in the authors⁽²⁾ list to refer to them.

5. HEADINGS

Use the decimal system in Arabic figures for the numbering of headings and subheadings. Major (or section) headings are to be in capitals and bold.

5.1. Subheadings

Subheadings or subsection headings (use style Heading 1, and indent) are to be in lower case with initial capitals and bold font.

6. EQUATIONS

Equations are to be numbered consecutively throughout the paper, centred, with the equation number in parentheses flush with the right-hand margin of the column. Leave a blank line before and after equations. Always refer to equations by number, as Eq. 1 or Eqs. 3-6, not as ‘above’ or ‘below’.

$$T_s = \frac{T_b}{1 + (\lambda T_b / \alpha) \ln \varepsilon} \quad (1)$$

7. FIGURES AND TABLES

Figures and tables can extend over two columns if required. Figure captions should be centred below the figures; table captions should be centred above the tables. Use full word ‘Figure 1’ or ‘Table 1’ in the caption. Use the abbreviation “Fig. 1” or “Tab. 1” in the text (even at the beginning of a sentence).

The author is responsible for obtaining all permissions prior to submitting the paper. All figures need to be permitted to be used by the original copyright owner.
